

# Non Operative Treatment of Back Pain and Cervical Spine Pain

Only one of its kind and specially imported vertetrac traction system has revolutionised non operative treatment for lumbar disc lesion & sciatica in the past 20 years.

With the help of this system Dr. M.G. Merchant (Orthopaedic Surgeon) and his team have been able to cure many patients with disc lesion where surgery was advised earlier.

## Dynamic Ambulatory 3D Traction

Vertetrac's lumbar and Cervical ambulatory traction system is an innovative and cost-effective approach to treating Lower Back Pain and Neck Pain and Sciatica.

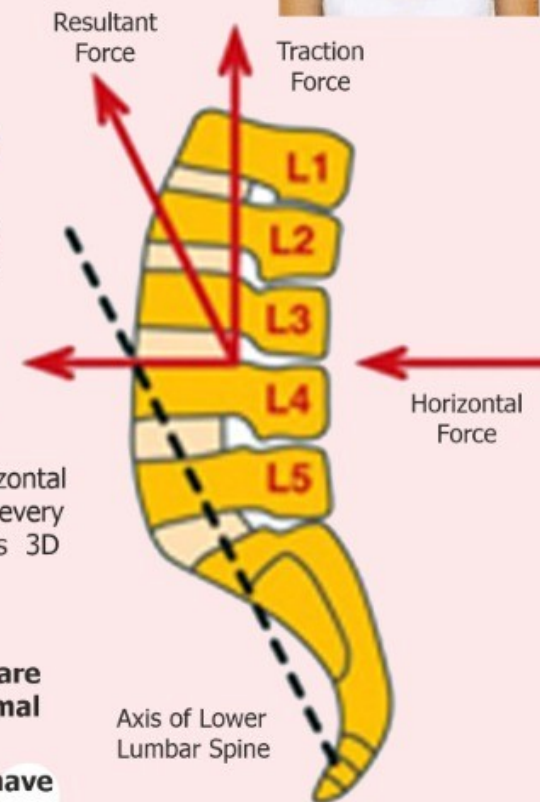

Vertetrac aims to bring relief to people suffering from lumbar spine & Cervical related injuries and disorders, including herniated discs, lower back, and Sciatica as an alternative to surgery, body braces, or traction bed treatments.

Vertetrac outperforms traditional traction by combining traction with horizontal force to enable simultaneous 3D decompressive traction therapy from every dimension. This unique combination is what enables simultaneous 3D treatment with asymmetrical traction options.

### Benefits and Advantages:

**Only 30 minutes per treatment session - Treatment sessions are significantly shorter and can be completed with minimal interruption of the patient's daily routine.**

**Complete freedom of movement - Patients wearing the device have the freedom to move and perform light activities during treatment, including walking, standing, or sitting.**
