

To The Doctor...

Thank you

Thank you Dr. Rahul Thakkar for serving your part of doctor in this time of Pandemic, I can understand that it was very difficult for you because not every patient must be negative but you have taken a very good step by building a flu corner which is located near the entrance of the hospital. which is a very good step. And one more important thing in this time of pandemic I was suffering from FIBROID cyst. I was not knowing it but then we went to Dr. RAHUL SISODIYA and he also made his 100% effort to treat me and then he advised to go to Subbecha hospital and you are the head Doctor of that hospital. And when the first meeting was fixed I was not knowing it that what has happened to me after the first meeting I got to know that I had FIBROID cyst and I have to suffer from an operation and before operation I had to suffer from biopsy. And very nicely you have done my biopsy and operation both so I Devansh K. Parmar has written this letter from my bottom of the heart and once again Thank you Dr. Rahul Thakkar and Subbecha hospital staff.
